## Sophia Gostelow

21 years of Holsteiner partnership and several years of experience of competing in grand prix level show jumping, Sophia Gostelow is your local Holsteiner Verband agent.

### Mare Matching and Stallion Selection:

Are you not sure which stallion you should breed to this season? With consultations between Sophia, Norbert Boley; managing director of the Holsteiner Verband and Gerard Muffels; head of the stallion stables, the team can pick the best stallion(s) suited to your mare. Simply email Sophia with your mare's information: pedigree, height, conformation photos and what you would like to improve with her offspring, may that be technique, power, gaits, conformation, temperament or your own choosing.

### Mare and Foal Registrations:

Mares bred a minimum 50% Holsteiner blood and are registered with Australian Continental Equestrian (ACE), Australian Warmblood Horse Association (AWHA), Hanoverians Horse Society Australia or any other studbook affiliated with the World Breeding Federation of Sport Horses (WBFSH) is eligible to be registered with the Holstein Global studbook. With the condition you register the foal of your registered mare you are eligible for Stud Fee I, a cheaper service fee across the stallions.

Foals bred by a Holsteiner licensed stallion, from a 50% Holsteiner blood mare registered with the Global studbook or an WBFSH affiliate, are eligible to be registered with the Holstein Global studbook. Foals registered will receive a Holsteiner passport and will be DNA tested therefore adding value and market to your horse.

### Performance Horses Sales:

Foals to young recently saddled horses to competitive grand prix show jumping, eventing and dressage horses with your personal preferred qualities can be found in Europe by the assistance of Sophia. The Holsteiner Verband hosts multiple auctions throughout the year and constant private sales occur Sophia can give you the ability to bid and trial ride (riding is Covid dependent) or do it all for you. Chris Chugg, Hilary Scott, David Robertson, Caroline Price and multiple young riders have purchased Holsteiner horses through Sophia.

### Young Rider Training Tours:

Prior to Covid-19, annually Sophia hosted a group of young Australian riders to the Verband for seven days of training and coaching with Holsteiner trainers and riders. We now look to bring coaches to Australia and New Zealand when the world is safe to do so before taking groups of riders back to Europe in the future.

**Contact**

The Holsteiner Verband is proud to support to customers all over the world. For you to receive the finest advice and service regarding all Holsteiner horses and the Holsteiner Verband organisation, we have successfully cooperated with partners in different countries for the past years and continue to grow these alliances in the future.

Our partners in Australia and New Zealand are Sophia Gostelow and Clare Friedlander.

Assistance is available for riders, owners or friends of Holsteiner horses with know-how, competence and passion. Buying horses, selecting a stallion or planning a visit can be aided by our partners.

Our representatives are available by phone or email to discuss your breeding plans and riding aspirations.

# EXPLANATION ON STALLION DETAILS

## X-Ray status

In a further bid for transparency and in order to provide you with another aspect for successful breeding, the stallion keeping GmbH has published the x-ray status of the Verband stallions for the first time this year. The qualified classification was carried out by Dr. Werner Jahn, member of the nationwide radiograph commission.

“With respect to this classification into categories it has to be pointed out that all these stallions meet the requirements as to x-ray soundness to the full extent. The listed stallions have been classified into the first 3 of 5 categories. Stallions classified into the 4th and 5th category are not even put up for stud.”

- excellent      These stallions have no findings = no abnormality detected/NAD
- good            These stallions have minor findings, like for example a chip or small bony outgrowth
- acceptable    These stallions have multiple findings or one OC/OCD, however, these findings did not prevent licensing with respect to suitability for breeding.

## Inspection marks

(for example 8776888 for the dam)

A stallion’s pedigree states his dam and second dam’s inspection marks. They have been graded on the following:

prior to 1995: type, top-line, depth of body, front legs, hind legs, correctness of gaits, brilliance and impulsion

beginning in 1995: type, top-line, correctness front legs, correctness hind legs, walk, trot, canter

## Considerations for breeding

Here Sebastian Rohde provides the breeders with ideas how to breed the stallion to best advantage. The considerations for breeding also factor in the breeding value evaluation and the linear description results.

## Testimonial on the stallion

*We have asked riders or other relevant persons for a short, personal statement on the stallions. Find these comments for almost any stallion in the stallion catalogue.*

## Details of the stallion

<b>Breeder</b>	Fielmann Guenther, Schierensee

Champion stallion Cahil in Neumünster

### Considerations for breeding

His offspring's most outstanding qualities are their excellent type and basic gaits. The day-to-day handling of this stallion is really uncomplicated because of his sweet personality and positive attitude, which deserve special attention. Cahil produces very interesting offspring when bred to mares influenced by TB blood.

# Cahil

by Cornet Obolensky - Contender

HOL | \*2017 | 170 cm | Grey | UELN: DE421000050917 | Mare family 776

Available in Australia and NZ

X-Ray status

Excellent

The champion of the 2019 stallion grading has attracted a lot of attention already during his first breeding seasons and the expectations have been confirmed by his offspring. In addition to his excellent bloodline, he shines in particular with his type and his jumping quality.

## Sire

Cornet Obolensky himself had caused a splash on the international show jumping scene with Marco Kutscher by winning gold at the Madrid Europeans with the German team as well as the Zurich world cup competition and the Rome and Rotterdam Nations Cups. In 2012, Cornet Obolensky was awarded the title of most successful German jumping horse. Over the last two decades he has had a great impact on the worldwide show jumping scene and has definitely demonstrated his quality as a sire with offspring like Cornet d'Amour, Comme il faut, Cornado I or Clooney.

His sire Clinton took fourth place at the Athens Olympics with Dirk Demeersmann; in addition to Cornet Obolensky, he has sired many other successful international top sport horses including Eldorado van de Zeshoek TN, Clintop, Cordess and Clintissima.

His second sire Corrado I, himself a successful international sport horse with Franke Sloothaak, became the founder of a sire line in the Holsteiner breeding programme.

Another asset from a breeder's point of view is Cornet Obolensky's damsire, Heartbreaker, a stallion much esteemed for his quality offspring.

Vienna Olympic

## Damline

Cahil's dam Operette III is by top stallion Contender. Her produce includes Vienna Olympic, an exceptional mare who made the top 25 with Sheikh Ali Al Thani at the Caen WEG at nine-year-old. Another daughter, Wonka, also boasts

Champion stallion 2019: Cahil

*A careful stallion with a good bascule, he just charms everybody with his personality, type, and beauty.*

Lucas Wenz, rider stallion stable

international achievements, won the Holsteiner State six-year-old Championship and produced the licensed stallion Forino.

Mare family 776 is currently the largest stem in the Holsteiner breeding programme. The branch established by Ernst Schacht in Todendorf is considered particularly successful.

## Own performance

Cahil completed 14-day ability assessment at Neustadt upon Dosse in 2020 with very good results. He was given 9.0 on free jumping ability, willingness to perform and ridability (test rider). He completed the test with a total mark of 8.78 (jumping weighted). In 2021, he completed sport testing for four-year-old stallions in Verden, where he received the final mark 8.22 (jumping weighted). In March 2022, Cahil completed part II of his sport test in Verden with a final weighted mark of 8.25.

Four-year-old, he already won young horse jumping classes at A level. Having undergone a great development, physically as well as under saddle, the stallion collected placings in young horse jumping classes up to M level and won several jumper classes up to 1.30m with Lucas Wenz.

Filly by Cahil-Quibery

## Offspring

Cahil's first crops proved convincing with regard to type and movement. At the Holsteiner foal auction in Falsterbo, a quality daughter out of a dam by Uriko (Wilfried Thoman, Drelsdorf) was knocked down at 17,000 euros to her new Swedish owner. Another Cahil-Clarcon colt foal (Bernd Börger, St. Michaelisdonn) won the Holsteiner state foal championship in Bad Segeberg. When his first season stallion candidates were presented for grading at Elmshorn in December last year he had a son licensed for breeding. In Belgium, another Cahil son has been accepted for the third stallion selection phase.

Casalls dam Kira XVII

### Considerations for breeding

The results achieved by Casall offspring speak for themselves. But like any successful breeding stallion, he is running the risk to be used for commercial purposes rather than selective breeding. Generally, Casall should be bred to leggy mares influenced by TB genes, as he comes from a performance dam line frequently characterized by less frame but great depth of body. As this is generally considered a Raimond inheritance, line-breeding to this stallion is not advisable.

# Casall

by Caretino - Lavall I

\*1999 | 168 cm | Bay | LN: DE321210208399 | Mare family 890

Available in Australia and NZ

X-Ray status  
Excellent

Casall has been the Holsteiner studbook's poster boy over the past years. Only very few stallions have had such an impact on the sport and on the breeding scene while still alive. There is no jumping horse studbook in the world that has not been influenced by Casall.

## Damline

Casall's dam Kira traces back to stem 890, one of the most successful Holsteiner performance mare families. At the 2005 Neumünster stallion grading, her son Clarence by Carano attracted a lot of attention and won reserve champion. Casall's second dam, Maltia by Raimond, produced Taura (by Lord), and Taura in her turn produced the licensed stallions Ringo Starr and Cesano I and II. The successful international sport horses, Crocodile Dandy (Alison Firestone) and Conally (Markus Renzel), are out of Taura, as well.

## Own performance

Under Rolf-Göran Bengtsson, Casall used to be one of the highest-achieving horses on the international show jumping circuit, making the top 25 at all major championships, the 2012 London Olympics, the 2013 Herning Europeans, and the 2014 Caen World Equestrian Games. Herning saw him win team bronze with the Swedish team and placing 4th individually. At Caen, he took fourth place again following a more than convincing performance throughout the championship week. Since 2011, he won 10 legs of the Global Champions Tour. In 2014, he placed second in the GCT's overall standing, tied with the winner, Scott Brash, and he finished on third place overall in 2015. In 2016, at 17, Casall won the Valkenswaard, Paris, and Doha legs as well as the overall standing of the Global Champions Tour. At 18, Casall retired from competition fit as a fiddle. And this top athlete ended his career with a bang as his farewell involved winning a Global Champions Tour leg in front of a home crowd. The farewell ceremony directly after the win in front of a teary-eyed audience was again very emotional. Casall is a living legend!

## Offspring

At the European championships in Milano, a Casall daughter stood out in particular: Cinca. The Casall-Carthago daughter (Peter Wylde, Belgien) jumped to team silver under the saddle of Michael Duffy. Other top successful international Casall offspring include Austria with Kent Farrington, Calleryama with Gilles Thomas (BEL), Caillou with Karl Cook (USA), Caracas and Jos Verloy (BEL), Cita and Daniel Coyle, Chesall Zimequest with Simon Delestre (FRA), Casello and Ludger Beerbaum, Cristallo A LM and Philippe Rozier (FRA), Wunschkind with Eric van der Vleuten (NED) Casallco with Philip Rüping and Casall with Ali Wolff (USA).

His daughters Vontessa, Akimba, Cascada I, Graziella, Indira VI, La Perla and N-Quinta won the Elmshorn elite mare show in 2008, 2011, 2013, 2017, 2019, 2021 and 2023, respectively. His sons Casaltino and Cadilo became champion stallions of the 2013 and 2018 Neumünster stallion grading, respectively. Two Casall sons won reserve champion stallion, Catch it in 2009 and Cascadello I, who sold at a record-breaking 600,000 euros, in 2011, and Cardin became second reserve champion in 2017. As yet, 103 of his sons have been stallion graded across Germany and 90 of his daughters have been awarded state premium status in Holstein.

Cinca with Michael Duffy

*The horse of my life! Casall and I have accomplished more than we thought possible. I owe him a lot. Today, you just could not imagine the international sport scene without Casall's influence as a sire. I hope I'll be getting the ride on many Casall offspring.*

Rolf-Göran Bengtsson, intern. top rider

Year upon year, Casall foals stand out for their convincing charm and class. Casall's sons and daughters realise top prizes at auction sales all over the world. At the 2019 StepheX auction sale, the highest-priced foals were by Casall, as well, with a Casall-Kannan filly knocked down at 96,000 euros and a Casall-Vigo d'Arsouille filly sold at 50,000 euros. At the Holsteiner foal auction held at the 2023 Hamburg Derby, a colt by Casall was knocked down at 26,000 euros.

A three-year-old Casall daughter, Catherina by Casall-Montender, attracted particular attention in the 2017 Holsteiner elite riding horse collection and was knocked down at 150,000 euros.

Charaktervoll

**Considerations for breeding**

Charaktervoll offspring are characterised by Holsteiner type, with good depth of body, yet athletic and with a smoothly connected topline. His first foal crops proved particularly impressive at the canter, a gait Charaktervoll himself excels in and which he has much improved in his offspring. Moreover, he is expected to pass on his propulsive power.

# Charaktervoll by Comme il faut WFA - Contendro I

\*2017 | 163 cm | Dark Bay | LN: DE421000051217 | Mare family 474A

This son of Comme il faut embodies archetypical Holsteiner type and presents himself as a model stallion with regard to type and athleticism. Charaktervoll is a youngster attracting the breeders' attention not only through his successful outings in competition but also his excellent offspring.

The young stallion is able to present himself to best advantage in all three gaits thanks to his well-constructed rectangular frame with a strong top-line and correct legs. His strong hind leg and back not only enable him to move with the desired up-hill tendency but also provide him with exceptional jumping potential. His excellent canter is a requirement for an optimum jumping process. His strength allows for the desired push at take-off in combination with a very good technique and great carefulness, and particularly impressive hind leg technique. Under the rider, he shows convincing thoroughness and excellent rideability.

## Sire

Comme il faut's breeding is a combination of international top successful bloodlines. In addition to his Olympic level own performance, his sire Cornet Obolensky has been one of the best jumping sires in the world for years now.

His dam Ratina made Olympic history as well. Her achievements with Piet Reymakers and Ludger Beerbaum include winning individual and team gold at the 1997 Mannheim Europeans, individual silver and team gold at the 1992 Barcelona Olympics and team gold at the 1994 Den Haag WEG.

Already at the Warendorf National Championship Comme il faut had stood out for his quality and carefulness. Later he went on to compete at international top level with Marcus Ehning, with his performance at the 2019 Rotterdam Europeans the crowning glory of his career.

## Damline

Charaktervoll's damline is influenced by successful international stallions, proven and reliable dams and an internationally successful Holsteiner mare family. The stallions in the tail female line, Contendro I, Capitol and Caletto II, are high-profile international sport horse

sires, all of them, with highly successful offspring up to Olympic level. Dam, second dam, and third dam have all produced show jumping offspring with S level achievements.

Mare family 474 has produced top level sport horses and breeding stock time and again. The most well-known current representative of this family is Q-Verdi, ridden by Maikel van der Vleuten.

## Own performance

Charaktervoll was given a jumping weighted total mark of 8.58 in the Neustadt upon Dosse stallion performance test.

He received 9.5 on his willingness to perform, and 9.0 on his jumping ability and temperament. He completed sport testing at Münster-Handorf with a final mark of 8.96 - canter 8.6, ability 9.2, technique 8.7, rideability 9.3 and overall impression 9.0.

Charaktervoll's first showing season in 2021 was very successful. In June, he became State Champion of the four-year-old jumping horses. He started in five classes, winning four of them at scores up to 9.2. Five-year-old, he qualified for the Warendorf National championship with Lars Bak Andersen and placed in young horse jumping classes up to M\* level. Since 2023, Charaktervoll is being produced by Rolf-Göran Bengtsson and has placed in the Youngster-Tour up to 1.40m level a number of times. The pair has already been attracting a lot of attention and the stallion's development confirms the high expectations.

## Offspring

Charaktervoll's first foals have demonstrated convincing type. In 2022, a colt by Charaktervoll out of a Cassini II dam (Deike Ahsbahs, Bokel) placed third in the Holsteiner state foal championship in Bad Segeberg.

In January 2024, a Charaktervoll son has been licensed for breeding at the DSP stallion grading at Neustadt upon Dosse.

Chezarro with Jayke Junge

### Considerations for breeding

Unlike his sire, Chezarro passes on height and modernity to his offspring. They also shine with good movement and elasticity. Chezarro himself stands out for his excellent rideability, good jumping technique and positive attitude in the show jumping arena.

# Chezarro by Casall - Conteur

\*2016 | 172 cm | Bay | LN: DE421000104716 | Mare family 1298

 **X-Ray status**  
● Good

Hopes and expectations for Chezarro's future are very high in view of his impressive quality as to rideability, bascule and technique demonstrated in the stallion performance test and his outings in competition. Having won young horse jumping classes in 2022, he is to continue his career under saddle in the youngster tour. Chezarro impressively combines willingness to perform and that special bloodhorse flair.

Boasting a very well-constructed top line, he is also a particular attractive eye-catcher thanks to his dark coat and distinctive markings. His basic gaits are of extraordinary quality with the dark bay always displaying an up-hill tendency with good rhythm and active hind leg. Chezarro's jumping lives up to his breeding, as he is very careful and demonstrates great intelligence and extraordinary quality as well as most impressive ability.

## Sire

Upon the completion of Casall's exemplary showing career in May 2017, the sole focus in evaluating this stallion has turned on his achievements at stud. The number of successful offspring is increasing year upon year and the champion of the 2018 Neumünster stallion grading, Cadilo, is also by Casall. Due to his offspring's worldwide achievements, Casall was listed on third position on the WBFSH sire ranking at just 19. Despite Casall and his offspring's great impact, it is necessary and of great importance for the Verband stallion keeping to have interesting sons, like Chezarro, a Casall son licensed in 2018, put to stud.

## Damline

The pedigree offers a wealth of interesting information on Chezarro's genetic background. His dam Siance is by Conteur, a stallion closely related to important sire Contendro I. His second dam, Ciance by Athlet Z, introduces the highly successful international blood of the top showjumping sires Alme and Gotthard into the bloodline. His fourth dam, a full sister to exceptional stallion Lord, is of particular interest, as Fiance contributes plenty of first rate TB genes to Chezarro's genetic make-up: the TB stallions Ladykiller and Cottage Son guarantee performance attitude and resilience.

*Everybody on the team loves Chezarro! He is not only a careful jumper with super reflexes, but he is also very rideable, expressive and has such a sweet personality.*

Jayke Junge, rider stallion stable

## Own performance

Chezarro completed 14-day-ability assessment with clearly good marks, receiving 9.0 on willingness to perform and 8.5 on temperament/character, canter, rideability and jumping aptitude, resulting in a total mark of 8.45 (jumping weighted).

Chezarro completed sport testing in Münster-Handorf in 2020. With a weighted final mark of 9.11, he was given 9.0 or better on all assessment criteria. Five-year-old, Chezarro had improved considerably again, completing his sport test with a weighted final mark of 9.78 - canter 9.5, ability 9.8, technique 8.0, rideability 10.0 and overall impression 10.0.

His first showing season was highly successful with Maximilian Gräfe. His first starts saw him chalk up three wins and four top placings in young horse jumping classes up to L level. Chezarro won young horse jumping classes up to L level in 2022 and took home a number of placings up to 1.35m level in 2023 and 2024.

## Offspring

His first foals are very modern, leggy, and with good movement. A colt foal by Chezarro out of a Carvallo-Ahorn dam (Boie Behrens, Volsenhusen) was sold through the Holsteiner foal auction at the Hamburg Derby in 2021. Also in 2022, a young colt by Chezarro out of a Casalito dam (Per Karl, Westerhorn) knocked down to new owners at 13,000 euros wowed the crowd at the Hamburg foal auction. The first Chezarro offspring were presented for stallion grading in Holstein and Hanover in 2023.

Clarimo with Rolf-Göran Bengtsson

### Considerations for breeding

There is no doubt whatsoever regarding his qualities as a sport horse sire. As he provides his offspring with great athleticism and tons of ambition, care should be taken on the dam's side, so that the mare is not too ambitious. In terms of conformation and foundation, Clarimo needs correct mares known for their reliable inheritance.

# Clarimo by Clearway - Caletto II

\*2003 | 172 cm | Grey | LN: DE421000278903 | Mare family 3389

Available in Australia and NZ

 **X-Ray status**  
 Acceptable

Another international top sire with regard to own performance and offspring stood by the Holsteiner Verband stallion keeping, Clarimo attracts attention all across the world as a sport and breeding stallion.

## Sire

Clarimo's sire, Clearway by Capitot I, achieved international placings with Lars Bak Andersen, for example at the Neumünster and Bayschweig grands prix. The great genetic make-up of exceptional mare Wodka is also brought out by her daughters Chika's Way (by Caretino), a mare with many international results, first under Janne Friederike Meyer, then Katrin Eckermann, and later Pius Schwizer, and Carassina (by Concerto II), winner of the Hamburg Derby under Thomas Kleis in 2009.

Clearway

## Damline

Clarimo's dam Wisma has made breeding history through her licensed sons, Cassini I and II. Cassini I in particular used to be one of the Holsteiner stud book's most in-demand sires.

His jumping quality is not down to random luck as Clarimo's bloodline combines the outstanding performance genes of the stallions Capitot I and Caletto II with those of Wisma and Wodka. Both mares have produced several outstanding jumpers during their career at stud. The produce of Lord daughter Wodka includes the licensed stallions Clearway, Conway I and II and Arturo, as well as Carassina, winner of the German Jumping Derby under Thomas Kleis in 2009.

## Own performance

In his first competition season with Janne Friederike Meyer, Clarimo stood out as a serial winner of young horse jumping classes at L and M level. He won the State six-year-old Jumping Championship and qualified for the National Championships. At seven-year-old, he already placed to S level in the international Verden and Neumünster youngster tours. In 2012, he was highly placed in jumping classes through S\*\* level. Since late 2012, Rolf-Göran Bengtsson got the ride on him, resulting in numerous international top placings in jumping classes through 1.60m level for example in Doha, Paris, s'Hertogenbosch, Hamburg, Valkenswaard, Lyon, Vienna, Rome, Cannes, and Gothenburg. Winning the 2016 Falsterbo CSI5\* grand prix was Clarimo's greatest success. He also had several excellent results with the Swedish team and was on the winning team of the 2017 Rotterdam Nations Cup leg. Unfortunately, Clarimo suffered a career-ending injury in the course of this competition.

Chardonnay under Max Kühner

## Offspring

Clarimo offspring are much sought-after and enjoy quite the reputation on the international show jumping scene. The many excellent results of Clarimo daughter Bardolina with Mario Deslauriers

*Clarimo is a stallion with loads of energy and tremendous ability. He has achieved a lot because he has always been a fighter. We are seeing more and more exciting Clarimo offspring at international shows now, with elasticity and scope, just as Clarimo himself.*

Rolf-Göran Bengtsson, intern. top rider

include winning the 2021 Calgary grand prix (Spruce Meadows). Other successful FEI level Clarimo offspring include Chardonnay with Max Kühner, GK Coco Chanel with Conor Swail (IRL), Canamera with Lauren Hough (USA), C-Steffra with Niklaus Schurtenberger (SUI) and Be Apperle VA with Diarmuid Howley (IRL)

In addition to all these highly interesting up-and-coming jumping horses, Clarimo has been attracting attention for his eventing offspring: Costbar won the National six-year-old eventing horse championship in Warendorf in 2017. Mc Claren is another highly successful eventing Clarimo offspring. With his rider Jonelle Price (NZL) he has placed to CCI4\* level.

As much as 19 Clarimo sons have been stallion-graded in Germany, Chardonnay being one of the most successful, with international placings up to 1.60m level under Max Kühner.

In 2023, Clarimo daughter N-Zauberzera (Bettina Friemel, Oyten) shone at the final ring of the Verband mare show and in the mare performance test where she stood out with a total score of 9.32.

Connor under Nicolas Delmotte

#### Considerations for breeding

By now many of his offspring have arrived at the highest level in sport showing that he does not prefer a certain bloodline to others. The mares should rather have a long enough body and produce horses with a sweet personality.

# Connor

by Casall - Cor de la Bryère SF

Available in Australia and NZ

\*2006 | 173 cm | Dark bay | LN: DE421000100306 | Mare family 6879

Having returned to Holstein, Connor has again succeeded in attracting the breeders' attention. By now, his offspring are internationally successful, confirming his value as a breeding stallion. The combination of the successful sport blood of Casall and the full sister to Corrado I guarantees high-performing and resilient sport horses.

Connor is a big-framed stallion with a particularly strong back, and with long and correct legs. Connor is coming to the fore as a sire and attracting the breeders' attention through his offspring. For example his son Conner JEI and Martin Fuchs provide publicity for Connor on a regular basis with top placings on the international scene.

## Sire

His sire Casall is a high-profile international performance sire considered one of the top achieving international sport horses of his time. His offspring, like for example Austria with Kent Farrington, Caillou with Karl Cook (USA), Ariso under Jordan Coyle (IRL), Caracas with Jos Verloy (BEL), Casallvano under Daniel Deusser or Wunschkind with Eric van der Vleuten (NED) underline his exceptional ability to pass on quality.

## Damline

Connor's dam is a full sister to Corrado I, successfully shown at international level by Bo Kristoffersen and Franke Sloothaak from 1991 to 1997, chalking up grand prix wins for example in Leuwarden, Dortmund, Aarhus, Neumünster, and Kiel. Corrado I succeeded in establishing a sire line of his own in Holstein and went on to produce international top horses like Corrada (Peter Charles), Cosima (Markus Fuchs), Think Twice (Leopold van Asten), Clinton (Dirk Demeersman) and Corradina (Carsten-Otto Nagel) for two decades.

The female line 6879 ranks among the high achievers of the Holsteiner studbook. Already in the 1950s, this mare family attracted attention with the successful mares Baden (Hans Evers) and Original Holsatia (Fritz Thiedemann), later with Landlord (Breido Graf zu Rantzau, Ludger Beerbaum), and Lausbub (Achaz von Buchwaldt). Later representatives include Carlina, who competed at the London Olympics with Switzerland's Pius Schwizer and Cassiato, winner of world cup classes with Australian Harley Brown.

## Own Performance

At six- and seven-year-old, Connor chalked up numerous wins in young horse classes and jumping classes up to S level, including the first ever Elmhorn seven-year-old jumping championship in 2013. Further improving his performance, he achieved numerous

placings in jumping classes to S\*\* level in 2014.

In 2016, Connor was leased to France and the ride given to Nicolas Delmotte. The two of them teamed up excellently and can look back on wins and placings at 1.45m level, for example at the Fontainebleau, Maubeuge, and Bonheiden shows.

## Offspring

As Connor's sons and daughters continue to prove themselves on the international sport scene, they are putting their sire on the radar. Top performers like Conner JEI (Martin Fuchs), Charmie (Antonio Alfonso/ITA), and Connor (Tanner Korotkin/USA) are by Connor. The results of his highly successful daughter Corsica include the victory in the Wellington grand prix at 1.60m with Rene Dittmer in December 2023.

In 2022, he had the champion of the six-year-old jumping horses in France, Connorado d'enfer (Connor-Cayado) while HSH Connor by Connor-Mermus R became vice champion of the six-year-old eventing horses in Le Lion d'Angers.

He has already produced twelve state premium mares and ten licensed sons in Holstein, including Chubakko, a stallion successfully shown by Christian Kukuk, Connect, as well as the premium stallions Christer and Coruscant.

Corfu de la Vie at free jumping

### Considerations for breeding

Corfu carries traditional, proven, archetypal Holsteiner genes. In spite of his ancestors' "old age" Corfu has sired very good foals on the selected mare basis. Observations have shown that Corfu has a very positive influence on modern and lighter mares, as he adds not only frame and size, but also jumping ability. His special personality suggests his offspring to be very clever horses.

# Corfu de la Vie by Cumano - Lord

\*2016 | 175 cm | Bay | LN: DE421000703316 | Mare family 741

Available in Australia and NZ

X-Ray status  
● Good

Corfu de la Vie is particularly impressive for his tremendous jumping ability, a quality not to be neglected in modern jumping horse breeding focussing on speed.

He has undergone an excellent development in particular towards the end of last season under the saddle of Jayke Junge. We have high hopes for Corfu's sport career and now, seven-year-old, he will be able to prove his ability in the youngster tour. The Cumano son's most outstanding points are his big frame, his strong top-line and his correct legs.

Corfu was born in Belgium and his breeder, Eric Goossens, went to great lengths to have then 23-year-old Hera bred to Cumano, a stallion only - and scarcely - available through frozen semen.

Cumano

## Sire

The Cassini I blood has had a great impact on a whole era of Holsteiner breeding, culminating in his son Cumano and Jos Lansink winning the 2006 WEG. Other than Cumano, in particular Eurocommerce Berlin, Rosalia la Silla, Carino and Carambole have earned worldwide recognition for the Cassini I blood and thus the Holsteiner studbook. Cumano's importance lies not only in his sporting career but also in his stud value. Bred only for a few years, and first and foremost in Belgium and France, he became a household name through offspring like Neptune Brecourt, Navalo de Poheton and Chilli Pepper van de Helle. His resounding ability to pass on jumping quality, scope, and performance attitude is rooted in his sire line as

well as in his dam line.

## Damline

Corfu's dam and her bloodline are of particularly sustained value. Lord daughter Hera's produce includes Colore, a licensed stallion successfully shown in competition as well as the FEI sport horses Colora and Quido van de Helle. Through the tail female line, she carries two stallions very typical for the Witt family's breeding programme, Romino and Sacramento Song/TB.

## Own performance

Corfu completed 14-day ability assessment in Schlieckau with an overall weighted mark of 7.83. In 2021, he received the final jumping weighted mark 8.36 in the sport performance test for five-year-old stallions, scoring 9.0 on rideability and 8.7 on ability.

Corfu's first showing season in 2020 resulted in top finishes in young horse jumping classes at 1.15m level, including fifth place at the four-year-old jumping horse State Championship at Elmshorn. Five- and six-year-old, Corfu was placed in several young horse jumping classes up to 1.30m level. 2023 Corfu was shown up to 1.35m level and placed at M level. Having undergone a very positive development, this athlete he placed up to 1.40m classes at youngster tours.

## Offspring

Corfu's first foals have been very promising.

A filly out of a Rigoletto-Acord I dam bred by Martin Prignitz, Kollmoor, proved particularly convincing in 2020. She won the foal championship of Steinburg breeding district and placed second in the VTV/R+V Holsteiner foal championship in Bad Segeberg.

Crack at free jumping

**Considerations for breeding**

Boasting great own performance and a very reliable damline, Crack should well be able to pass on athleticism and performance. He is certain to pass on his genial personality and super rideability. Mares should have a smoothly connected topline. He very reliably produces frame and height.

# Crack by Cornet Obolensky BWP - Candillo

\*2015 | 170 cm | Grey | LN: DE421000412115 | Mare family 1020

Available in Australia and NZ

 **X-Ray status**  
● Excellent

CRACK – the 2021 National Champion of the six-year-old jumping horses returned to the Warendorf venue in the most impressive way in 2023 and took home the grand prix with Richard Vogel. Then the combination went on to win a great number of international placings up to 1.50m level. This Cornet Obolensky son is thrilling in his exceptional rideability and willingness to perform. These qualities along with his ability and way of jumping make him a stallion with a massive potential in sport and as a sire.

## Sire

With several World Cup, Nations Cup and championship placings under his belt and having crowned his career under Marco Kutscher with team gold at the Madrid Europeans in 2011, Cornet Obolensky is considered one of the most successful international top level show jumpers of his time. He has been retired from the active show jumping scene since and is now considered one of the best jumping sires in the world. Names of high-achievers like Cornardo NRW, Cornet d'Amour, and Comme il faut are directly connected to Cornet Obolensky. Cornet Obolensky also carries proven Holsteiner genes through his paternal grandsire Corrado I, his maternal grand sire Nimmerdor, as well as Randel's sire Ramiro.

## Damline

Crack's dam line has distinguished itself at international level in competition. His sister Corcega la Silla by Casall attracted a lot of attention in youngster classes at international horse shows with Rolf-Göran Bengtsson and is now very successfully shown at S level by Jose Antonio Chedraui, particularly in Mexico and North America.

A brother to Crack, Inar C by Quidam de Revel, competed in jumping classes at international level to 1.50 m already at nine-year-old.

His second dam Adele has also produced the successful sport and breeding stallion Quinar by Quidam de Revel.

## Own performance

Crack completed 14-day ability assessment in Neustadt (Dosse) with flying colours. His free jumping ability was marked 9.0 and he was

*I'm just thrilled about this stallion's willingness to perform - his character and his work ethics are exceptional. When approaching a high jump, I feel that everything is possible with this horse.*

Richard Vogel, intern. top rider

given 8.0 on rideability by the test rider. The final mark was 8.6 (jumping weighted).

The Cornet Obolensky son Crack won the Verden sport test by a clear margin in 2020. With a final mark of 9.25, his was the best result of all five-year-old jumpers across Germany. This mark was made up of the marks 8.8 (scope), 9.0 (canter), 9.2 (technique), 9.5 (overall impression) and 10.0 (rideability).

Crack's exceptional jumping quality had become obvious already in his first showing season in 2019. He won almost all young horse classes he was shown in at marks up to 8.6. Brought on further and matured, he qualified for the five-year-old National Championship in Warendorf in 2020. In 2021, Crack became State and National Champion of the six-year-old jumping horses, an exceptional and unprecedented success for a Verband stallion. In 2023, Crack was placed at international 1.50m level with Richard Vogel and has won 1.45m classes in Mexico. At the national championships in Warendorf he hit it big again: victory in the grand prix of Warendorf!

## Offspring

Crack had as much as four offspring at the 2021 Holsteiner elite foal auction, with each of them realizing in excess of 10,000 euros. Constantin, a Crack-Contender colt, was knocked down at 17,500 euros by the auctioneer at Elmshorn. In 2022, an exceptional Crack - Casall foal (Nicola Heyser-Burger, Borsfleth) was knocked down at 23,000 euros at the foal auction held at the Hamburg Derby.

Two sons from his first foal crops have been stallion graded, Crackeur (out of a Cassini II-Lombard dam) and Call me Crack (out of a Carvall-Caretino dam). At the elite riding horse auction held in autumn 2023, a Crack daughter, Nilla, was knocked down to an international sport stable at 35,000 euros.

Daikon

### Considerations for breeding

This young stallion embodies many positive qualities. Being a son of Dominator, he is particularly agile, with loads of energy and ambition. Even though one has to be aware of the concentration of Cassini I genes, he also carries the now rare genes of Ladykiller TB and Alme.

# Daikon by Dominator Z-Cassini I

HOL | \*2018 | 166 cm | Dark Bay | UELN: DE421000129118 | Mare family 18A2

Available in Australia and NZ

X-Ray status

Excellent

Daikon is more and more able to confirm the exceptional free jumping talent he demonstrated at his grading in January 2021 under saddle as well. Physically well-developed and at an age-appropriate training level, Daikon is very eager and ambitious as he goes about his work, which is definitely a good thing even though he is still a bit overzealous.

He is a remarkably agile jumper with an extremely nimble canter. Again and again, exceptionally talented jumping stallions like Colorado, Carthago, or Cassini have left their mark on the breed in the more recent Holsteiner breeding history. This talent is also the most outstanding quality of Daikon, a stallion licensed in January 2021. His strength, pushing power, technique, carefulness, and the way he uses his hind legs when jumping are nothing but exceptional.

The dark bay has attractive markings and a very positive energy. A strong and compact top-line is characteristic for the now four-year-old. The legs are correct throughout, with well-angled hind quarters. His basic gaits are ground-covering and regular. The canter stands out the most – long striding and balanced with impressive carrying power.

## Sire

Dominator Z has a high profile at international top level sport with Christian Ahlmann. The combination's achievements include winning the grands prix of Doha, Stockholm, and Hamburg. Through Cassini I - Franklin – Athlet, the Diamant de Semilly son goes back to the Holsteiner mare family 3017; the family's most important produce is the stallion Lord Liberty.

## Damline

The damline of Daikon traces back to stem 18A2 from Dithmarschen. Representatives of this highly important mare family include the Derby winner Calle Cool, the exceptional jumper Pikeur Dylon or Catwalk, who used to be on top position on the WBFSH ranking. The stallions

*A very ambitious stallion, very willing to perform. Daikon carries sufficient TB blood to be predestined for competition.*

Lucas Wenz, rider stallion stable

on the dam's side of Daikon's pedigree, Cassini I, Landjunge, Ahorn, Caletto I, and Wahnfried are all exceptional Holsteiner jumping sires and guarantors of quality produce of this branch off stem 18A2. Daikon's third dam, Zita, is particular significant, as she stood out already as a young jumper with wins under the saddle of Tjark Nagel. She went on to compete at S level with Stephan Abt and Achaz von Buchwaldt, and was also successfully shown in high-jump competitions. Zita's stud performance is impressive, in addition to Daikon's second dam, Summer by Landjunge, she also produced two 1.60m jumpers, Cordero and Hatschibuh.

## Own performance

Daikon underwent 14-day-ability assessment in Neustadt/Dosse in September 2021 and received a final mark of 8.58 (jumping weighted). He was given 9.0 on character, temperament, willingness to perform and jumping aptitude (free jumping).

In 2022, Daikon completed sport testing in Verden where he received a final mark of 8.09 (jumping weighted), scoring 8.50 on ability and 8.10 on technique.

In April 2023 Daikon successfully underwent sport testing at Münster-Handorf with a weighted total score of 8.10. His ability (8.50), canter (8.20) and jumping technique (8.10) proved particularly impressive. Gaining first horse show experiences at four- and five-year-old, Daikon has won young horse jumping classes at A and taken top placings at L level. His promising potential has been confirmed by his first horse show outings with Lucas Wenz. The pair placed 2024 in young show-jumping classes up to 1.30m.

Deichkind

**Considerations for breeding**

In view of his good basic gaits, very good balance and high-quality free jumping, Deichkind should be an interesting option for many mares. His own natural athleticism is backed up from both sides of his pedigree.

# Deichkind

by Don VHP - Limbus

\*2020 | 167 cm | Chestnut | LN: DE421000012520 | Mare family 8763

Available in Australia and NZ

X-Ray status

Excellent

Deichkind had attracted a lot of interest already at the Neumünster grading in February 2023. Our delight in securing this awesome athlete for the stallion keeping GmbH has not abated since. On the dam's side, Landgraf I, Alme, and Ramzes, all of them known to have put their stamp on their offspring, account for this typey young stallion, same as the amazing sires Diamant de Semilly, Voltaire, and Ramiro on the paternal side. The fact that he carries only a few drops of Cor de la Bryère blood deserves particular attention.

At the stallion grading this son of Don VHP Z convincingly demonstrated his natural and intelligent free jumping characterized by carefulness and good judgement. Also under the saddle the stallion's performance is totally convincing as he displays excellent balance and rideability. With his correct conformation, very harmonious lines and very good legs along with a nice and friendly personality he is a welcome addition to the Holsteiner Verband stallion keeping GmbH stable.

## Sire

His sire Don VHP Z is an international elite level sporting legend. Under the saddle of Harrie Smolders he has jumped 100 odd clear rounds at 1.60m level. In 2017 he carried his rider to claim silver at the Rotterdam Europeans and they won the Nations Cup final in Barcelona.

## Damline

Deichkind comes from an internationally very successful damline which has been bred by the Lüneburg family for generations. His second dam, Jakina, used to be a jumping horse to international 1.45m level herself and has produced several show jumping offspring with S level results. The produce of his third dam, Unke V, also includes numerous international sport horses, like for example Leica (Rasmus Lüneburg), Ragazzo (Andreas Ripke), and Alcassina (Jule Lüneburg).

Deichkind is a prime example of a next generation stallion: he is athletic, intelligent, and always motivated. Moreover, he is a pleasure to be around and very uncomplicated.

Lucas Wenz, rider stallion stable

## Own Performance

Deichkind successfully underwent short ability assessment at Münster-Handorf in April 2023, where he received a jumping weighted final score of 8.15 under the saddle of his breeder Rasmus Lüneburg.

At the age of four, Deichkind placed and won young show jumper classes up to level A\*\* under Lucas Wenz.

Diarado at his approval in Neumünster

### Considerations for breeding

He has made a name for himself as jumping and eventing sire. The mares should have sufficient height and frame. With his clearly positive ability to pass on rideability and high quality basic gaits, Diarado is getting more and more attention, particular in eventing.

# Diarado

by Diamant de Semilly SF - Corrado I

\*2005 | 169 cm | Seal bay | LN: DE421000339405 | Mare family 318D2

Available in Australia and NZ

X-Ray status  
● Good

Diarado - hardly ever, the Holsteiner stallion licensing in Neumünster has seen an equally clear-cut and celebrated champion as in 2007. Diarado's description by then breed director Dr. Nissen reads as follows: "The champion stallion oozes incredible charisma and epitomizes modern sport horse type. His magnificent type goes along with a good topline, a strong back and four perfectly correct legs. His basic paces improved from fairly good walk to good trot, crowned by a perfect canter. But his presentation reached fever pitch in the free jumping phase where he demonstrated perfect judgement from the very first approach, jumping with a flexible body, excellent leg technique and unbelievable scope, all of which earned him a 10.0."

## Sire

Diarado carries world champion blood through his sire, Diamant de Semilly, a member of the gold winning French team under Eric Lavallois at the Jerez World Equestrian Games in 2002. Bred for performance, Diamant de Semilly – just like his sire Le Tôt de Semilly, an own son of legendary Grand Veneur – counts among the most successful stallions in France.

## Damline

Diarado's dam is by Holsteiner jumping horse sire Corrado I and a full sister to licensed stallion Crawford. Through the famous stallions Lord and Ramiro, the dam line goes back to the highly successful stem 318D2 bred by the Bernhard family. This mare family has produced the studs Corofino I + II, Coriano, Chello I + II as well as champion stallion Camiros.

## Own performance

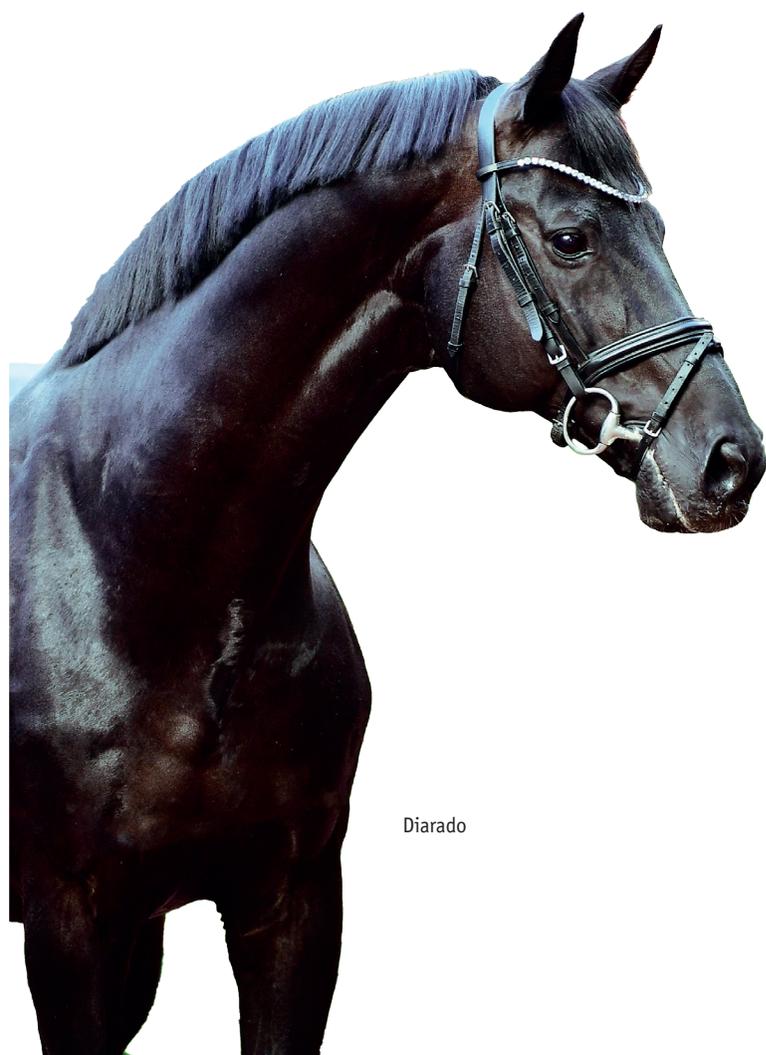

Diarado's performance is obvious – he won the Schlieckau stallion performance test at 150 index points overall; four-year-old he won young horse jumping classes scoring 9.0; five-year-old he won the qualifier to the National Championship final with the marks 9.0 and 9.3, and placed third in the final, scoring 9.0, and nine-year-old he took third place in the S\*\*\* level grand prix at the Dobrock horse show, to name only a few achievements.

## Offspring

Diarado foals realize top prices, like for example Die Zuckersüße by Diarado-Colman, another top foal at the 2021 Elmshorn elite foal auction sale. In 2015, JL Dublin by Diarado was one of the most expensive horses in the Holstenhall. This Diarado son made history in 2021 by winning individual and team gold at the European eventing championships with Nicola Wilson. In 2018, another top horse by Diarado, Diadoro, changed hands through the Neumünster elite riding horse auction realizing 90,000 euros. In Germany, 61 of his sons have been licensed as yet and he has by now produced 16 state premium mares.

Diarado offspring have become firmly established on the international top level sport scene. Holstein-bred Dicas by Diarado-Cassini I - Lancetto jumped to several international placing up to 1.60m level with US American Margie Goldstein-Engle. The most successful Diarado offspring is Don Diarado, representing Germany at championship level with Maurice Tebbel. The international WBFSH sire ranking manifests Diarado's ability to produce exceptional sport horse offspring: Diarado is on twelfth position as a jumping sire and tops the eventing sire ranking in 2023.

The stallion is owned by an international syndicate formed by Paul Schockemöhle Pferdehaltung GmbH, the Dutch stallion keeper Joop van Uyttert and the Holsteiner Verband Hengsthaltungs GmbH.

Dinken under Thomas Konle

### Considerations for breeding

This stallion stands in particular for ambition and willingness to perform and passes on this qualities with great reliability. Many of his offspring are scopey jumpers with very good reflexes. His own height notwithstanding, he can sire very tall offspring. In view of his offspring's successes, he is turning more and more into a performance sire.

# Dinken

by Diarado - Cassini I

\*2010 | 167 cm | Bay | LN: DE421000707310 | Mare family 2294

Available in Australia and NZ

X-Ray status  
● Good

This grandson of Diamant de Semilly attracts more and more attention as a breeding stallion thanks to the quality of his offspring. Strong and powerful with a medium frame, his pedigree accumulates all major performance sires of the last decades.

A rare succession of world class sires with Diamant de Semilly, Cassini I, Caretino and Marlon TB in the first generations, in the background safeguarded by Le Tot de Semilly, Corrado I, Contender, Lord, Ramiro, Capitol I and several crosses to sire extraordinaire, Caletto II – this is Dinken's pedigree.

## Sire

His sire Diarado, Holsteiner champion stallion in 2007, attracts attention for his own performance and particularly for his offspring. His progeny, including his highly successful sons Don Diarado, Dicas, and Donatello have earned him a reputation as a top sire, as documented by the international WBFSH sire ranking, placing Diarado on 12th position in the jumping division while being the no:1 eventing sire in 2023.

## Damline

Dinken's dam Inken has been successfully shown at international level by Peter Wyld. At three-year-old she won champion mare of North Frisia breeding district. She has stamped her son in terms of type, structure, and boundless performance attitude. Her produce includes four show jumping offspring with results to international S level, Quinken (Max De Mol), Quinka (Hikari Yoshizawa), Incaro LS (Tom Martens) and Dinka (Hikari Yoshizawa). Moreover, her daughter Ninken (by Littorio) has produced the stallion-graded international jumper, Clicksem.

## Own performance

Dinken performed impressively during 30-day testing. With his jumping ability judged 9.0, his jumping breed value was estimated at 134 points. During the 2015 season, Dinken achieved many very good results under Jonas Panje. He won several young horse jumping classes at L level and was highly placed in young horse jumping classes at M\* level. The combination also qualified for the National Championships in Warendorf. In 2016, Dinken competed in young horse jumping classes to M level with great success. He qualified for the Warendorf National Championships again and won the Elmshorn six-year-old Holsteiner Jumping Horse

*We have been using Dinken quite a lot ourselves and we are very happy with his offspring. They are fun to work with every day, straightforward, honest, rideable horses with a great attitude.*

Jochen Ahsbahr, Breeder of the year 2018

State Championship. A severe tendon injury meant the end to Dinken's sport horse career.

## Offspring

Dinken's foal crops are particularly impressive: Characterized by excellent type, they are energetic and display outstanding movement. His breed value based on foal evaluation is in the top range at 122 points.

As yet, Dinken has eleven licensed sons across Germany, including the stallion Dubliner. In 2020, Dilaro by Dinken-Casall impressed the grading committee in the Holstenhall.

Dax by Dinken became the 2022 National Champion of the six-year-old jumping horses in Warendorf. Richard Vogel and the Dinken-Corrado I offspring (Dirk Georg Jessen, Jardelund) jumped to finish first in the final of this high calibre young horse class. Dax' near perfect bascule and his quick reflexes – typical of Dinken – proved particular impressive.

The first Dinken offspring arrived at youngster tour level have chalked up first jumping results at S level. Among them Dollar-Kl, who had already performed impressively at the 2019 world championship for five-year-old jumping horses in Lanaken with Filip Dolezal/CZE. Ducati and Mario Walter placed in jumping classes up to international S\*\* level. Denana, a Dinken-Ibisco/TB daughter has a number of placings up to 1.45m level with Frank Wagner.

Dubliner

### Considerations for breeding

The first crops by Dubliner present themselves performance oriented, typey and with good movement. With lots of blood himself, the stallion is best bred to mares really in need of his energy and willingness to perform. The combination of his qualities should make him well suited to excel as an eventing sire with regard to movement, stamina, and jumping quality.

# Dubliner

by Dinken - Canturo

HOL | \*2017 | 173 cm | DkBay | UELN: DE421000113317 | Mare family 95

Available in Australia

X-Ray status  
Excellent

The first foal crops sired by this Dinken son carrying international jumping blood of the very first order on the dam's side have proved very impressive. Very energetic and willing to perform himself, he passes on movement and elasticity to his offspring. His jumping is characterized by his extraordinary front leg technique resulting from his natural born carefulness as a jumper. Dubliner is a very sensitive stallion with tremendous potential. Further training in line with his current development will soon enable him to prove his quality in the show jumping arena to the breeders.

Raised by the Holsteiner Verband, he was presented for pre-selection in August 2019 where he put up a performance befitting a modern, typical Holsteiner produce. Boasting long lines and a very good top-line, the stallion displays perfectly rhythmic and very ground-covering movement, always with an up-hill tendency. He jumps with tremendous ability, excellent front leg technique and energetic push-off.

Dinken under Jonas Panje

## Sire

His sire Dinken is one of the promising stallions in the Holsteiner breeding programme. He won Holsteiner six-year-old jumping horse State Champion and qualified for the Warendorf National Championships at five- and six-year-old. A severe tendon injury prevented Dinken from further pursuing his sport horse career. By now the Diarado son has succeeded in convincing breeders and riders with his ability to produce quality offspring. Dinken's dam, Inken by Cassini I-Caretino, is one of the best brood mares in the Holsteiner breeding programme.

## Damline

Dubliner's damline traces back to stem 95, a long-time and reliable producer of exceptional sport horses and breeding stock, representatives including for example Romantika (W. Peters/D. Hafemeister) or Claudio (Bo Kristoffersen).

Dubliner is the first foal out of Cantura. Her dam's produce includes the successful S level competitor Queichtal. The third dam, Maroni, used to be successfully shown to S level, herself. Most significantly, the damline carries three highly successful international stallions - Canturo, Cassini I and Coriano - in direct succession.

## Own performance

Dubliner underwent 14-day testing at Schlieckau in May 2021 with a final mark of 8.45 (jumping weighted). The same year, the stallion completed sport testing with a weighted final mark of 8.45 in Verden. In 2022, Dubliner completed the Verden sport test with a jumping weighted final mark of 8.37. He received 8.5 on ability, 8.4 on technique and overall impression and 8.3 on canter.

At his first outing in competition, Dubliner won the first test of the Holsteiner state championship right away, scoring 8.8. In the final of the four-year-old jumping horses, the stallion placed fourth with Massimo Bonomi.

At five- and six-year-old, with Dubliner adopting a calmer approach in the arena, his results include a number of placings in young horse jumping classes at L level. 2024 he placed up to 1.30m classes under the saddle of Lucas Wenz.

## Offspring

Dubliner has had some very interesting offspring from his first crop of foals, with two foals selected for and sold at the Holsteiner foal auctions, one of them the extremely typey Dubliner-Chello I colt Dynamite, bred by Sönke Eggers, Struvenhütten and the other a Dubliner-Casall daughter, bred by Hof am Sylvert-Rörden GbR, Witsum/Föhr.

Keaton im Trab an der Hand

**Considerations for breeding**

He appears to be reliable in passing on his quality movement and jumping potential to his offspring. Even though mares should be sufficiently modern, height should not be an issue. As his sire Kannan might come through all the same, he is best bred to modern mares. He is sensitive, yet good-natured – another point in favour of using this stallion other than to improve sport horse qualities.

# Keaton by Kannan KWPN - Contendro I

\*2016 | 177 cm | Bay | LN: DE421000056816 | Mare family 4847

Available in Australia and NZ

X-Ray status  
● Excellent

This eight-year-old Kannan son totally embodies Holsteiner type and shines in particular with his very good basic gaits; moreover, he attracts attention through extraordinary ability and his careful jumping. Keaton has performed brilliantly all along the line, chalking up excellent results in young horse jumping classes including at the National championship 2021. Now produced by Rolf-Göran Bengtsson, he looks back on first successful starts at international level. As a sire, he has already produced interesting and widely noticed stallion candidates from his first crops. Keaton offspring have been repeatedly attracting attention at foal shows due to their good and elastic movement

## Sire

His sire Kannan has officially ranked among the top sires in the world for years, with sport horses like Olympic winner Nino de Buissonnets, Quabri de L'Isle and Molly Malone an obvious reflection of his sire qualities.

## Damline

His dam sire Contendro I used to be one of the most frequently used stallions in Germany with successful showjumping offspring like Codex One, Conthendrix and Holiday by Solitour. Contendro I has also established an excellent reputation for his eventing offspring, with the Contender son topping the 2018 WBFSH eventing sire ranking.

The damline was bred through famous stallions like Ramiro and Landgraf I, as well as the TB sires Der Löwe and Royal Wash, with the mare Nigella a half sister to the licensed stallions Lancer I-III.

The Holsteiner studbook has seen Keaton's mare family 4847 come to the fore again and again through sport horse produce like Carlos Boy and Lysander and the licensed stallions Cascadello I+II, Lancer I-III and Cachas.

## Own performance

Keaton completed 14-day ability assessment with flying colours. The judges awarded him 10.0 on character, 9.75 on temperament, 9.5 on willingness to perform and 9.0 on jumping aptitude, resulting in a jumping weighted total mark of 8.68.

In his first showing season, Keaton closed up many top finishes in young horse jumping classes at A level, for the title of Lisa-Minou

Eggers.

At five-year-old, Keaton won several young horse jumping classes up to M\* level scoring as high as 9.2. He performed brilliantly at the Warendorf National Championship, jumping clear in all three classes. In the final, he placed an excellent sixth with Massimo Bonomi.

Six-year-old he continued his streak of success as he won and placed in young horse jumping classes up to M level and again qualified for the National Championship. Since 2023, Keaton has been at the stable of Rolf-Göran Bengtsson, who had had an eye on the stallion for quite some time now and the combination placed up to 1.40m level at international level this season.

## Offspring

Keaton has had very interesting and typey foals in his first crops, and definitely hit it big with his second year stallion candidates: three Keaton offspring had been accepted for the Holsteiner stallion grading in December 2023 and all of them have been licensed, including the second reserve champion stallion, Keystone out of a Quinar-Corofino I dam, and the premium stallion Kantato out of a Casall-Cassiano dam, now stood by the Holsteiner Verband at Elmshorn.

Holsteiner riding horse auction clients from all over the world have proved impressed by Keaton's oldest offspring as they have been sold to expert hands. Another Keaton daughter, Nubia BB (Manfred Birchler, CH-Bilten) became first reserve champion mare of the 2023 Holsteiner elite mare show at Elmshorn.

Million Dollar

### Considerations for breeding

Million Dollar provides an interesting outcross option – only Cento by Capitol and Chin Chin in the 5th generation carry Holsteiner blood. Given the high concentration of top jumping genes, the stallion is expected to breed with great reliability. Mares known as reliable producers of Holsteiner type and Holsteiner way of going should be bred to this outcross stallion, preferably.

# Million Dollar

by Plot Blue (KWPN) - Vigo d'Arsouilles (BWP)

\*2012 | 171 cm | Bay | LN: BEL002W00301601

Available in Australia and NZ

X-Ray status

Excellent

Stood by the Holsteiner Verband, Million Dollar provides the breeders with an extraordinary option. Under the saddle of Sophie Hinners he clearly demonstrated his potential over the 2022 season and wowed the crowds with his special charisma and quality jumping. The stallion displays the colourful markings of his sire Plot Blue. His movement is very good, with an outstandingly consistent walk, very forward and ground-covering, a trot with good knee action, and a very efficient, powerful and well-carried canter. His jumping is more than convincing, extremely careful, with a good bascule, an excellent push-off and the ability to be expected from his bloodline.

## Sire

Million Dollar carries a rare concentration of top level sport performance genes. His sire Vater Plot Blue won team gold at the Lexington WEG in 2010, won the World Cup final in 2010 and the Top 10 final in 2009. His damsire Vigo d'Arsouilles won individual gold at the Lexington WEG in 2010 and his third sire, Cento, was team gold medalist at the Sydney Olympics, won the World Cup final in Leipzig and the Aachen grand prix.

## Damline

Million Dollar's dam, Gin Tonic de Muze, was only ever used for breeding, but his second dam, Daytona de Muze, was successfully shown at 1.60m level by Jody Bosteels and later sold to the USA. His third dam, Wallon de Muze, used to be a successful sport horse (1.60m) with Michel Hécart, same as her full sister, Walnut de Muze, with Harrie Smolders. The fourth dam, Qerly Chin by Chin Chin, was successfully shown at international level by Eric Lamaze.

The family of Million Dollar is described as follows by their founder, Joris de Brabander: "The horses from this mare family have good looks and good movement. They are easy to ride and have been demonstrating their sport performance potential at international level over generations."

## Own performance

He was 30-day tested in Schlieckau in December 2015 where he scored 8.25 on rideability and 9.75 on jumping ability. He has been approved for the Holsteiner breeding programme at the Elmshorn licensing in January 2016.

Million Dollar passed his Münster-Handorf stallion sport test with flying colours. In terms of scores it meant 8.8 on ability and overall impression, 8.5 on rideability and technique, and 8.3 on canter, with a weighted final score of 8.57.

Four- to six-year-old, Million Dollar became a serial winner in young horse jumping classes through M level under Ebba Johansson. For further training, he came to the stable of Jos Lansink to be shown by Frank Schuttert (NED). Having been well-produced and selectively shown at international level, he returned from Belgium with placings up to 1.45m to join the stable of Sophie Hinners. For the visitors of their first outings in Kronenberg and Opglabbeek it was very obvious that this combination is a successful one. Wins and placings in three-star-rated Nations Cups with the German team in Mannheim (2nd), Bratislava (1st) and Budapest (1st) crowned the season for this exceptional pair.

Unfortunately, a hernia put an end to Million Dollar's showing season already in late July 2022. Million Dollar has recovered well and is stood at Elmshorn where he is available to the breeders.

## Offspring

Million Dollar's first offspring are seven this year and wow breeders, riders, and owners. His daughter Kalifa (Sophie Hinners), the 2022 Warendorf National Champion found new owners through the PSI auction sale in December, where she was knocked down at 500,000 euros. His successful offspring have put Million Dollar on top of the six-year-old sport horse Hippomundo ranking. From 360 starts, 46 percent of his offspring have returned with a placing – by international comparison, a very good ratio, indeed.

As yet, Million Dollar has had twelve sons licensed for breeding in Germany, including the second reserve champion of the 2019 Holsteiner grading, Milbridge, and Million's Way, a stallion also stood by the Elmshorn stallion stable.

His offspring sold through the 2023 auctions include Massimo (out of a Cormint dam), a top horse knocked down to China for 77,000 euros at the elite auction.

Million's Way

### Considerations for breeding

He carries famous horses and Million's Way is certain to make his way in sport and at stud. In view of his sire Million Dollar and his half-brother United Way's reliable inheritance, backed up by performance mare Carassina, this stallion can definitely be expected to pass on many positive sport horse qualities. His correctness and good foundation deserve special mention and are definitely a major plus.

Available in Australia and NZ

# Million's Way

by Million Dollar - Concerto II

HOL | \*2017 | 166 cm | Bay | UELN: DE421000018717 | Mare Family 1916 | \*ET

X-Ray status

Excellent

This licensed Million Dollar son has a pedigree of exceptional value and a prominent lineage, with a high stud and sport profile proven in jumping classes up to 1.60m level. While he cannot deny his sire, you can also clearly see his dam and this combination is just unique. The combination of top Belgian blood on the sire's side with one of the very best Holsteiner mare families has resulted in an athlete with impressive ability and very bright prospects. At the same time he has great stud value and anticipation is running high to see his influence on the breeding programme.

## Sire

Million Dollar carries a rare concentration of top level sport performance genes. Listing Plot Blue, Vigo d'Arsoilles, and Cento, his pedigree reads like the Who's Who of international sport horse breeding. Million Dollar clearly demonstrated what he is capable of in 2022. With Sophie Hinners he shone in classes up to 1.55m and won the Bratislava and Budapest Nations Cups with the German team.

Million Dollar has also proved his genetic ability, as his daughter Kalifa became National Champion of the five-year-old jumping horses in Warendorf in 2022. At the Holsteiner auctions he was represented by several highly interesting offspring, like for example La Douce, a mare knocked down at 50,000 euros to the USA.

## Damline

Million's Way's half-brother is United Way, a licensed stallion which has been winning over the breeders with his offspring already at a young age. Their dam, Carassina, is a unique mare, seeing that she first demonstrated her exceptional class as a sport horse with Thomas Kleis and went on to have a profound influence on the breed later.

*Million's Way does not only shine as a jumper with his great potential and powerful push-off, but also off the course, with his sweet personality.*

Lucas Wenz, rider stallion stable

The numerous international results of this dream combination include winning the German Jumping Derby in Hamburg in 2009. The second dam, Wodka, produced the licensed stallions Arturo, Clearway, Conway I and II as well as eight show jumping offspring with results to S level, including Chika's Way, a highly successful S level mare first shown by Janne-Friederike Meyer-Zimmermann and later Katrin Eckermann.

Million's Way's damsire, Concerto II, deserves special attention in this exceptional pedigree as this Contender son has been able to produce successful jumping horses in rare concentration. With only few of his daughters put to stud, they are considered as precious gems.

## Own performance

Million's Way completed 50-day performance testing in Neustadt upon Dosse in the autumn of 2022. With a final jumping weighted mark of 8.40, he was given 9.0 on willingness to perform and 8.75 on rideability (test rider) and character, and 8.5 on ability and jumping technique.

Brought into the sport at five-year-old by Selina Köhl, he won a young horse jumping class at A\*\* and was placed at L level.

2023 he was able to follow up on his previous results by placing at L level right away with Lucas Wenz. In the current season, the pair has achieved placings up to 1.30m.

We have high expectations for the first foal crop by Million's Way.

United Way

### Considerations for breeding

Willingness to perform and high-quality jumping – every attentive bystander knows about these qualities exhibited by United Way. And also his offspring turn out to be greatly influenced by their TB ancestors and are always willing to perform. A particularly good group of 2023 stallion candidates demonstrates the reliability of his inheritance and his ability to improve the mares he is bred to. At all inspection sites his foals are easily recognised due to their distinctive type and movement. At a young age, this stallion is already known to stamp his offspring.

# United Way by Uriko KWPN - Concerto II

\*2015 | 170 cm | Bay | LN: DE421000408615 | Mare family 1916

Available in Australia and NZ

X-Ray status  
● Good

His name has become well-established on the current breeding scene. He seems to have inherited his quality and the ability to pass it on from his dam in particular. United Way is a sire with an impressive ability to stamp his offspring. His offspring attract attention at nearly all foal and young stock sites. He passes on in particular his rectangular frame, his athleticism, and his terrific rideability to his offspring. Other qualities making this sire stand out from the crowd are his personality which makes him easy to be around and his positive attitude.

## Sire

His sire Uriko is successfully shown to S\*\*\* level and has become quite the high-profile sire. A great number of licensed sons, including champion and reserve champion of the Neumünster stallion grading, as well as top successful showjumping offspring, like for example Uricas v/d Kattevennen, very successfully shown at international 1.60m level by Harrie Smolders (NED), testify to Uriko's value for the breed.

## Damline

United Way's second dam, Wodka has produced the licensed stallions Arturo and Clearway, as well as Conway I and II. She has eight showjumping offspring with S level results, including United Way's dam, Carassina by Concerto II. Having already achieved results to S\*\*\* level under the saddle of Nisse Lüneburg, Carassina was sold to Udo Chistee (Schlosshotel Wendorf) in 2008, with the ride given to Thomas Kleis. The successful combination not only collected numerous international results but also won the Hamburg German Jumping Derby in 2009.

Carassina

United Way's bloodline deserves special attention for his dam sire, Concerto II. This Contender son which died from colic at just five-year-old produced a rare count of successful showjumping offspring. With only a few daughters put to stud, these are considered exceptional gems. Upon retiring from competition, Carassina was put to stud again. Four-year-old, she had already produced one offspring (by Cardino) which went on to become a successful sport horse in Australia. United Way, born in 2015, is Carassina's first post-career produce.

## Own performance

United Way underwent 14-day ability assessment at Neustadt upon Dosse with impressive results in April 2018. He was given 9.5 on willingness to perform and 9.25 on temperament, and also very good marks – 9.0 - on jumping ability (free jumping) and character. The jumping weighted total mark 8.65 was among the top marks achieved in this test.

United Way completed sport testing with excellent results. He received 9.3 on ability, 9.0 on overall impression and 8.8 on rideability.

The stallion had his first outings in competition with Ebba Johansson in 2019; among other results, they placed second in the qualifier to the State four-year-old jumping horse Championship at a score of 8.2.

*That United Way's bloodline is steeped in athleticism is something you realise right away. He does an awesome jump, has great work ethics and is easy to handle.*

Lucas Wenz, rider stallion stable

While United Way was side-lined by injury at five-year-old, at six-year-old, he took home wins and high placings in young horse jumping classes at M level and confirmed his modern sport horse qualities by scoring up to 9.2. In 2023, United Way has been carefully developed and placed through 1.30m level. With Lucas Wenz, the stallion attracted attention with impressive rounds and has achieved placings up to 1.45m classes.

## Offspring

United Way had several championship foals from his first crops, including the winning colt of the Pinneberg breeding district, by United Way-Casall in 2020. In 2022, the United Way-Colman filly Paisley (Klaus Thiedemann, Oesterwurth), the highest priced lot of the Holsteiner elite foal auction, was knocked down at 25,000 euros to France.

Maybe M saw a lot of interest at the Holsteiner elite riding horse auction, where Italian clients thrilled about the United Way - Diarado daughter's exceptional quality invested 72,000 euros in the mare.

United Way produced a licensed son right away in his first season: Update was stallion graded at the main licensing in Neumünster in 2021. Other United Way offspring have been sold to international sport stables through the auctions.

Union City by United Way (out of a Connor dam) was named first reserve champion stallion of the Holsteiner grading held in February 2023, and is stood by the Holsteiner Verband stallion keeping GmbH. Also in December 2023 a United Way son attracted attention at the Elmshorn grading: United Pleasure (out of a For Pleasure dam) greatly impressed the panel and has been awarded the sought-after premium title. The grey stallions will be complement the Holsteiner Verband stallion roster at Elmshorn.

Uriko

**Considerations for breeding**

A successful sport horse and performance and jumping horse sire of international calibre, Uriko has had a great impact on the Holsteiner stud book these past years. The sheer number of his sport horse offspring is impressive. He should be bred to mares characterised by good rideability and willingness to perform.

# Uriko KWPN by Untouchable KWPN - Lavito

\*2007 | 172 cm | Bay | LN: NLD003200707442 | Mare family 4172

 X-Ray status  
● Good

At just 17 years, he has already founded a sire line of his own and boasts excellent sons and licensed grandsons. Only few stallions succeed in having such an impact in such a short time. At the same time, his offspring perform convincingly all along the line in competition, having become firmly established on the international scene and in young horse championships.

With his modern type and very well-constructed top-line he has had a very positive influence on the Holsteiner breeding programme in recent years. Many of his qualities which he also passes on to his offspring are of major importance for modern sport horse breeding. In particular his athleticism deserves special mention here. Already now, Uriko is a sport horse sire of extraordinary importance!

## Sire

Uriko's sire Untouchable, performance-tested in competition at international top level himself, results from a cross of a son of French top sire Papillon Rouge to Dutch top stallion Heartbreaker. Through Carthago, Calypso I, Romantiker, and Cottage Son/TB the bloodline traces back to the important Holsteiner mare family 18A2.

## Damline

Uriko's dam Wizzard is a daughter of Lavaletto son Lavito, a maternal grandson of top sire Carthago. Wizzard's dam line goes back to mare family 4173 with crosses to the performance sires Corrado, Rocadero, Fasolt and Marlon/TB. Just recently, successful international sport horses from this family like for example Balourado, a Baloubet du Rouet son ridden by Robert Smith, have been attracting attention.

## Own performance

Uriko underwent performance testing in autumn 2011, with the judges confirming the talents previously shown by the young stallion. With his canter graded 9.25 and his jumping ability 8.83, his total stallion performance test-based breed value is 130.

Uriko boasts an impressive track record under Maximilian Gräfe as

he won six jumping classes at S\* level and was highly placed in jumping classes to S\*\* level. He continued his success story under Ebba Johansson with placings to S\*\*\* level.

## Offspring

Uriko's foals are characterized by very good type. He has already produced eleven licensed stallions including Unlimited, the 2016 Holsteiner champion stallion, and Uno I, the 2017 reserve champion stallion. A total of three Uriko sons have been licensed for breeding at the 2017 Holsteiner stallion grading.

His offspring's quality tells its own tale. His son Uricas v/d Kattevennen finished third in the 2023 Global Champions League - Super Cup finale in Prague with Harrie Smolders, which earned him 333,333 euros. Bull Run's Jireh (damsire: Colman) is successfully shown up to 1.60m level by Kristen Vanderveen in the USA. Uriga VA (damsire: Clarimo) finished third at Deauville in the CSI03\* Nations Cup with Diarmuid Howley. And also his daughter Charisma HS brings attention to her sire: The Uriko-Casito mare owned by Hugo Simon became National Champion of the five-year-old jumping horses with Richard Vogel in 2019 and is now highly successfully shown at international level by Sergio Alvares Moya (ESP).

Vigado at free jumping

### Considerations for breeding

Vigado's first two crops attracted a lot of attention. Obviously the stallion produces the most interesting offspring with very typey and leggy mares with correct conformation. His own jumping ability same as his potential to pass on this quality are beyond question. In his day-to-day willingness to perform and learn, he displays sport horse qualities of the highest order.

# Vigado

by Vigo d'Arsouilles BWP - Quo Vados I

\*2018 | 168 cm | Chestnut | LN: DE421000167818 | Mare family 776

Available in Australia and NZ

X-Ray status  
Excellent

The champion of the 2020 stallion grading boasts excellent sport horse qualities. Now six-year-old, his willingness to perform, cleverness and ridability are particular impressive. He is still undergoing physical development, and his balance is steadily improving as he performs with unrivalled confidence.

## Sire

The pedigree of Vigo d'Arsouilles is stamped by the exceptional sires Nabab de Reve, Quidam de Revel and Jalisco B. The big-framed chestnut won the 2010 world jumping championship in Lexington (USA) with Philippe Lejeune. Other top international show jumping offspring by Vigo d'Arsouilles, who died at 21, include Fair Light van't Heike (Alberto Zorzi), Vagabond de la Pomme (Pénèlope Leprevost), Irenice Horta (Cian O'Connor) and Ego van Orti (Edwina Tops-Alexander).

Vigo d'Arsouilles under Philippe Lejeune

## Dameline

The very first foal out of Quo Vados daughter Goya has been crowned champion stallion of 2020 - Vigado. The second dam, Tora II by Cash and Carry, has also produced two successful sport horses by Quo Vados, Querry and Quno, with with results up to 1.60m, both. The third dam, Nancy (by Concerto II), has produced two 1.60m

jumpers, Cash and Go and Cash up, as well as Vigado's second dam, Tora II, all by Cash and Carry. The produce of the fourth dam, Fanny by Capitol I, includes a 1.60m jumper, Cardea 2 by Caretino, as well.

## Own performance

Vigado passed short ability assessment with a final jumping weighted mark of 8.66 in Verden. He was given 9.3 on willingness to perform and 9.2 on jumping.

Vigado completed sport testing, also in Verden, in March 2022: 9.0 on ability and overall impression, 8.8 on technique and rideability and 8.5 on canter resulted in a total jumping weighted mark of 8.81.

Four-year-old, Vigado already placed in young horse jumping classes at A\*\* level. At five years of age he won young horse jumping classes up to L level and was placed up to 1.30m level with Sophie Hinners.

The 2024 season is really successful for Vigado and Lucas Wenz. They placed in young showjumper classes up to 1.35m and became vice champion at the Holsteiner Championships for young showjumpers at Elmshorn. Vigado also qualified himself for the Bundeschampionat 2024 in Warendorf.

## Offspring

His second crop was impressive, as his foals demonstrated thrillingly athletic make and shape with good movement.

The young Vigado sons and daughters also met with a lot of interest at the Holsteiner foal auction. One of them, Very Nice (out of a Casall dam) was knocked down to US American clients at the 2023 Hörup foal auction for 17,000 euros.

Zuccarello under Joni Paavola

### Considerations for breeding

This stallion has the typical Holsteiner charm. His pedigree represents the modern Holsteiner sport horse with current performance sires. In line with his genetics, he boasts boundless jumping potential. His impressive hind leg technique deserves special mention as it is demonstrated by his sire in the same way and has seemingly been passed on. He should be bred to mares with good basic gaits.

# Zuccarello

by Zuccero - Uriko

X-Ray status

Good

HOL | \*2019 | 167 cm | bay | UELN: DE421000022019 | Mare line 776 | \*ET

This up-and-coming Holsteiner sire displays quintessential Holsteiner type and size and carries current performance genes. His sire Zuccero has arrived at the highest level in competition, his dam Graziana I used to be very successful in young horse classes and the second dam has made a name for herself through several successful sport horse offspring. Zuccarello's jumping is characterized by his sire's qualities: He is very careful by nature, with a powerful take-off and particularly impressive hind leg mobility. Under the saddle still cautious, but well developed.

Anticipation is running high for his first offspring, as this young sire holds great promise with his tremendous natural ability.

## Sire

Zuccero is highly successfully shown at international level by Rolf-Göran Bengtsson, crowning his promising career to date with the team gold medal at the European championships in Milan (ITA). For generations, Zuccero's damline has been producing successful international sport horses. His half-sister Gareza is a successful international show jumper to 1.50m level. His second dam's produce includes Scuderia 1918 Princy, successful up to 1.60m level. His third dam, Varese, is also dam to the stallion Lordano – third in the German Jumping Derby with Rolf-Göran Bengtsson in 2003. His fourth dam, Larese, is none other than Chin Chin's dam.

## Damline

His dam Graziana was shown in competition only for a short time, but with great success, winning young horse jumping classes at A and L level. His second dam, Shamrock, is also dam to Crunch, an influential sport and breeding stallion. Shamrock's show jumping offspring also includes Dito by Diarado, with results to 1.60m under Denis Lynch.

His third dam, Herzdame, also produced a show jumper with results to 1.60m, Lake Tahoe.

His fourth dam, Verina by Caletto II, won the two-year-old class of the Holsteiner Verband elite mare show at Elmshorn in 1985. Bred by the Gempf family in Stelle-Wittenwuth, she was purchased by the Roskoth family of Satrup and became the foundation mare of this successful branch of mare family 776 now bred and maintained by daughter Miriam Kühl in Broderstorf (Mecklenburg- West Pomerania).

The maternal line traces back to Paul Bahlmann's successful stud in Moorhufen.

## Own performance

Zuccarello passed short ability assessment with a final jumping weighted mark of 7.98 in Warendorf in May 2022. He was given 8.7 on rideability, 8.1 on canter, and 8.0 on willingness to perform. Zuccarello completed sport testing in Münster-Handorf with a jumping weighted final score of 8.26, having received 8.40 on ability as well as jumping technique.

Available in Australia and NZ

HOL | \*1994 | 173 cm | Grey | UELN: DE321210202194 | Mare Family 3389

Cassini II at free jumping

Cassini II was never shown in competition, even though his free jumping performances gave proof of his tremendous ability. Having made a name for himself for his very successful sport horse offspring. His son Monaco N.O.P. under Harrie Smolders is the most successful Holsteiner horse in international top sport. He jumped to fifth place in the 2022 WBFSH ranking with successes such as second place in the World Cup Final in Leipzig.

Available in Australia and NZ

HOL | \*2013 | 173 cm | Grey | UELN: DE421000038513 | Mare Family 890

Catch under Rolf-Göran Bengtsson

With Rolf-Göran Bengtsson, Catch placed in several international classes up to 1.45m level, for example in the Mannheim (sixth) or Herning (second) horse shows. Catch's sire Colman is considered one of the best sons of exceptional sire and top jumping horse, Carthago; with Jos Lansink, the multiple grand prix winner competed at the Olympics twice. Not just since Casall, Catch's damline, stem 890, numbers among the most successful families of the Holsteiner studbook. Known as "von Horsten stem", the family has a reputation for their extraordinary willingness to perform. Sold to America in late 2022, Catch is still available to the breeders through frozen semen.

# Larimar by Lavall II - Lord

\*2004 | 170 cm | Bay | UELN: DE421000143804 | Mare family 4294

! Available in Australia and NZ

Larimar under Alexandra Bitter

The blood of TB stallion Ladykiller has become a rarity by now even though Holsteiner performance breeding has originally evolved through the Ladykiller blood. As it has been fading into the background lately, a stallion like Larimar is even more valuable. Larimar's offspring performing excellent in competition include Larisal with Urh Baumann, successfully shown at international S level. Lord Mexx is another licensed Larimar son and a successful sport horse. Under the saddle of Angelos Touloupis (GRE) he boasts placings up to 1.55m.

# Lasino by Landgraf I - Capitol I

HOL | \*1991 | 170 cm | Bay | UELN: DE321210161491 | Mare Family 2543

Lasino

Available in Australia and NZ

The stallion Lasino is a representative of the Holsteiner studbook's coveted L line and his pedigree reads like a Who's Who in show jumping. By Landgraf and with Capitol I, Lord, and Roman on the dam's side, his pedigree has the Holsteiner studbook's most important jumper sires closely knit together. Lasino attracted attention in particular for his FEI show jumping offspring. With Alois Pollmann-Schweckhorst, his son Lord Luis was a member of the Nations Cup winning German team in La Baule and came 2nd in the first leg of the Global Champions Tour in Doha/Qatar which comes with big price money.

# Quantum by Quidam de Revel - Cor de la Bryere

HOL | \*1994 | 169 cm | Dark Bay | UELN: DE321210112494 | Mare Family 18B1

Quantum

Available in Australia and NZ

Then with a still very youthful appearance, Quantum won second reserve champion at the 1996 stallion licensing. Already at that time he stood out for his excellent performance type, balanced conformation and light-footed movement. Quantum's dam Ulla by Cor de la Bryère comes from mare family 18b1, which has produced many important sport horses and breeding stock for the Holsteiner stud book. Quantum's offspring like Silvertras with Jur Vrieling, Quality Time TN with Jeroen Dubbeldam/Charlie Jacobs (USA), AD Quantina with Mathilda Karlsson, Fixdesign Chopin with Filippo Marco Bogni (ITA) and T-Quinta with Norbert Ell (POR) performed convincingly all along the line at international top level.

# Terms and Conditions - Australia

**1.** The breeding season begins on the 1st of August 2024 and ends at the 1st of April 2025.

**2.** The Holsteiner Verband Hengsthaltungs GmbH, Elmshorn - GERMANY, hereafter named Stallion Stable, provides frozen semen of selected Holsteiner Verband stallions for inseminations in Australia.

**3.** Prior to a mare's first insemination by a Holsteiner Verband stallion, mare owner and representative of the Holsteiner Verband in Australia, Sophia Gostelow, must agree on an insemination contract, confirming the person signing the contract to be the owner of the

mare stated in the contract or the owner authorized representative.

The owner of the mare is to provide the following information and agrees that the data will be passed on to the Stallion Stable: mare (name, pedigree, life no.) mare owner (name, address, membership no.). Plus the details of the requested inseminating vet intended use for embryo transfer telephone number and e-mail-address.

**4.** The Stallion Stable Germany will invoice the mare owner the booking fee after the insemination contract is signed and returned to Sophia Gostelow. This booking fee allows the mare owner to inseminate the mare named in the contract with frozen semen from one of the Stallion Stable's stallions in one breeding season for a maximum of three heats with one dose per heat. Dose will be shipped to your chosen vet one dose / heat cycle at a time as required.

**5.** If the last insemination was before more than 30 days and no veterinary certificate is provided that states that the mare is not pregnant, the stallion specific pregnancy fee will be charged by the Stallion Stable Germany. It is the mare owner's responsibility to inform Sophia Gostelow that the mare is not pregnant otherwise a positive pregnancy will be assumed and invoiced from Stallion Stable Germany.

**6.** The reduced stud fee 1 is only available to mares registered with the Holsteiner Verband and owned by Holsteiner Verband members. Stud fee 2 will be charged for all other mares.

In relation to stud fee 1, all stallions incur a foal fee payable after a living foal has been born. Should a mare successfully breed in the 2024/2025 breeding season and not produce a living foal the following season, a corresponding veterinary certificate must be submitted to the representative by 1 st March 2025. Otherwise a foal fee might be charged. If the mare loses the foal after the second payment, the breeder will be allowed to try again with the same mare and stallion in the next season only having to pay the booking fee again.

Please note: The person stated on the insemination contract will be charged the pregnancy fee and the foal fee, even if the mare has been sold since.

**7.** It is mandatory to state a mare's intended use for embryo transfer when closing the insemination contract. Moreover, mare owner and stallion keeper must sign a separate Embryo Transfer Agreement prior to first insemination. Each flushing of an embryo as well as the surrogate mares must be documented and the breeder must inform the stallion keeper as to the result immediately. In case of an embryo transfer without prior notification, the double price is charged for each insemination. The stallion-specific booking fee will be charged for every flushed embryo (also when frozen). In case of successful embryo transfers, the pregnancy fee will be charged for each pregnant surrogate at 30 days after insemination. Casall is only available for embryo transfer with a special permission in writing.

**8.** Should a mare bred in 2024/25 not conceive and a veterinary certificate stating the barren status is submitted to the representative within 30 days after the last insemination, no pregnancy fee will be charged.

**9.** Should individual terms of this contract be or become inoperative, this will not affect the remaining terms of this contract. German law shall apply under exclusion of the United Nations Convention on Contracts for the International Sale of Goods (GISG). Place of jurisdiction shall be the registered seat of the Holsteiner Verband Hengsthaltungs GmbH, Elmshorn, GERMANY provided that the customer is a merchant, a legal entity governed by public law or specialized agency subject to public law or the customer has no place of general jurisdiction in Germany. In case of doubt, the German terms and regulations shall apply.

Please note these terms and conditions may change or be edited by the Holsteiner Verband Germany at anytime.

# Terms and Conditions - New Zealand

**1.** The breeding season begins on the 1st of August 2024 and ends at the 1st of April 2025.

Please note these terms and conditions may change or be edited by the Holsteiner Verband Germany at anytime.

# HOLSTEIN GLOBAL

The Holsteiner Verband has extended the range of its breeding programme to allow breeders with horses from eligible improvement breeds entry to the Holsteiner studbook.

**Mares as well as stallions from breeds listed as eligible for improvement and refinement purposes in the Holsteiner Verband breeding programme can be registered into the Holsteiner Verband studbook and their offspring can participate in the Holsteiner breeding programme.**

## **MARE BOOK HOLSTEIN GLOBAL**

Mares registered with a WBFSH affiliated breed society and from a breed listed as eligible for improvement and refinement purposes in the breeding programme of the Holsteiner Verband can be presented for registration into the mare book Holstein Global at various inspection and registration sites in Schleswig-Holstein, across Germany, and abroad.

## **OFFSPRING PRODUCED BY THESE MARES**

The produce of these mares – the next generation – will then be registered into the Holsteiner Verband foal book, provided that the foals are by a stallion listed in the Holsteiner Verband stallion book I. These foals with 50 percent Holsteiner parentage are issued Holsteiner registration papers. Female foals registered in this way are eligible for registration into mare book I at three-year-old, while colts may be presented for pre-selection to the Neumünster stallion grading.

## **STALLION BOOK HOLSTEIN GLOBAL**

Upon application, any at least three-year-old stallion may be registered into the Holsteiner Verband stallion book Holstein Global provided that he has been approved by and is registered with a WBFSH affiliated breed society, is from a breed listed as eligible for improvement and refinement purposes in the breeding programme of the Holsteiner Verband and can provide age-appropriate stallion performance testing results.

# A FIRM EYE ON THE FUTURE

## INFORMATION ON HOLSTEINER BREEDING

**MARES MAY BE INSPECTED AND REGISTERED** at breeding stock inspection sites or – upon application – at your premises. In Schleswig-Holstein, mare inspections take place in May, in the extended breeding area from late June to September. Visit our website [www.holsteiner-verband.de](http://www.holsteiner-verband.de) to find the exact dates as well as the application form on <https://www.holsteiner-verband.de/der-verband/zucht-und-körung/stuten>

**FOAL REGISTRATION:** Report your foal's birth to the Holsteiner Verband by using the Foal/no Foal Report (from the stallion keeper along with the Covering Certificate). Upon successful notification you will be issued all the documents required for attending a foal inspection and registration site.

Find more information on this topic on our website [www.holsteiner-verband.de](http://www.holsteiner-verband.de) on <https://www.holsteiner-verband.de/der-verband/zucht-und-körung/fohlen/von-der-geburt-zur-registrierung>

## FOR ALL QUESTIONS

concerning the eligibility for registration of mares, stallions, and foals, please contact the Holsteiner Verband Kiel team, phone +431-3059960, fax +431-336142 or send a copy of the pedigree papers to the adjacent e-mail addresses.
